

## Merodis advises on sale of Pulssar Technologies to Tecan

20 April 2017, Brussels, Belgium,

Merodis, the Belgian member of the M&A network euroMerger, is pleased to announce that it successfully advised Pulssar Technologies' shareholders in the sale of the company to Tecan. This transaction reflects Merodis' commitment to provide its corporate finance expertise to European mid-sized companies and highlights its ability to work with major players in cross-border deals.

Pulssar Technologies is an innovative French provider of long life, high precision piston pumps that are ideal for the automation of dispensing and pipetting tasks in life sciences instrumentation. The configurability and unique features of Pulssar's piston pumps, combined with Tecan's advanced pump technologies and robotic solutions, offer real synergistic value for new and existing customers.

Tecan ([www.tecan.com](http://www.tecan.com)) is a leading global provider of laboratory instruments and solutions in biopharmaceuticals, forensics and clinical diagnostics. Founded in Switzerland in 1980, the company has manufacturing, research and development sites in both Europe and North America and maintains a sales and service network in 52 countries. In 2016, Tecan generated sales of EUR 464 million (CHF 506 million) and shares of the Group are traded on the SIX Swiss Exchange (TECN; ISIN CH0012100191). The acquisition of Pulssar Technologies perfectly complements the Tecan Cavro® range of syringe pumps and pipetting solutions. This gives instrument designers an even broader choice of liquid handling technologies – as well as an array of robotic and valve options – backed by Tecan's application expertise and global support infrastructure.
